we need public transport, affordable housing and childcare desperately.

acceptable

affordable housing and more affordable activities for families.

always room for improvement

as a young adult, i strugglw finding any type of affordable housing. No activities for people my age. Community focuses primarily on youth & seniors.

Cameron is a great resource for the community

could be better

could use more actinity

def need mental health and substance abuse centers in this area, need lots more preventative and education on most topics from above. affordable housing. activities for kids of all ages are needed in this area.

Definite need for more in-patient/intensive inpatient treatment for substance use and mental health.   Also, more programs to assist with cost of treatment and transportation to/from treatment.

Desperately NEED a Kidney Dialysis Center

good availability

good hospital

good shape since covid

great PT dept" Dr. David Watkins"

I appreciate all Cameron Hospital does for the community. They have brought in great providers. It is great to have this in Angola and not have to drive to Fort Wayne. Thank you!

I live in Auburn but I go to Angola for many of my medical needs. My medical stays at Cameron have been good and the staff there was excellent. I prefer Cameron for all of my medical needs even though I am only minutes away from my local hospital. I am able to see my hematologist in Angola. I do have to go to Fort Wayne to see my pulmonologist. The greatest need that I see right now is the need for more preschools and daycares as well as the need for dialysis in the Angola area. Thank you for your time.

improving

Inpatient mental health services are needed. Also, availability of outpatient services outside of 9-4 hours, or decreased impact on work if taking time off for mental health visit during working hours.

Internet in this area is not good in the slightest, and the cost of the internet for bare minimum connection is despicable

lack of providers

lots of good things happening but need as above

Need more healthcare services, inpatient services, and transportation services

need to help senior on a fixed income

needs a transfusion!

needs improvement with cost

Needs in housing, trails and internet needed.

not bad but could be better

Our community desperately needs a kidney dialysis facility. There are many in our community that must travel as far as FW/Auburn/Kville 3 times a week regardless of weather. Many of these folks are elderly. If a dialysis patient must be hospitalized for any reason, they must fo to FW as Cameron cannot even provide dialysis on an emergency basis. We are in desperate need...please please consider this.

overall, the community does an amazing job.more programs directed towards families, teen &children is a need. As someone who is in the nutrition service/education and health coach program.

people are overweight, depressed and frustrated

Positive your diabetic nurse is wonderful. Dr. berry Miller is professional caring and so is his staff.

pretty bad cooukd encourage more physical activity and exercise

Room for improvement for all ages, social classes, and level of education.

sidewalks on both sides of Wayne St to Menards, sidewalks connecting to bike trail from Easton Place subdivision,

some people are on disability that can work

The addition of bike trails, disc golf and other "free" activities for families will help the community to promote healthier lifestyles, community bonding and happiness overall. I would love to see more healthy eating restaurants such as more vegan options that fit the hours of traditional working folks would be amazing! I want Steuben county to be a place that is full of peace, friendships and growth!

The mental Health in the community has such a high need. the lack of services for mental health needs across the board is beyond high. The mental health of everyone has been affected at high rates over the past two years and there is not enough resources to keep up. the pride of not wanting others to know you are struggling is huge too. the more people get help the more normal it will be.

This community definitely needs more senior independent living communities that include independent living and assisted living. We need more public transportation besides STAR. Maybe instead of more fast food places, we could build a pavilion to hold the farmers market so people wouldn't have to walk in the scorching sun and vendors wouldn't have to put up awnings to sell their stuff.

transportation and mental health are priority needs!

We could definitely use a dialysis center in angola

We have most things on this list in some quantity. We have no dialysis available in this country at all. Not even in a case of emergency. That is a shame.

we have overweight problem in community

We need a strategy across the board to help our community grow

We need to make the healthy choice an easier choice!
